Document Title	**Shift Roster & Manpower Planning — E-Commerce Operations**	**SOP Number**	SOP-OPS-002
Prepared By	Operations Analyst (Fresher)	**Version**	1.0
Department	Operations — Customer Support / Warehouse / Delivery	**Effective Date**	01-Nov-2024
Approved By	Operations Manager	**Review Date**	01-May-2025

1. PURPOSE

This SOP defines the end-to-end process for planning, assigning, and tracking weekly shift rosters for the operations team in an e-commerce organization. It ensures that minimum headcount requirements are met across all three shifts — Morning, Afternoon, and Night — at all times, and that week-offs, leaves, and shift swaps are managed in a structured and auditable manner.

2. SCOPE & APPLICABILITY

Department	Team Size	Shift Coverage
Customer Support	10 Employees	Morning / Afternoon / Night
Warehouse Ops	10 Employees	Morning / Afternoon / Night
Delivery Ops	10 Employees	Morning / Afternoon / Night
TOTAL	**30 Employees**	**3 Shifts x 7 Days**

3. SHIFT STRUCTURE & MINIMUM HEADCOUNT

Shift Code	Shift Name	Timing	Min. Required	Roster Color
M	Morning	6:00 AM – 2:00 PM	8 Employees	Light Blue
A	Afternoon	2:00 PM – 10:00 PM	8 Employees	Light Green
N	Night	10:00 PM – 6:00 AM	6 Employees	Light Purple
W	Week-Off	—	Max 6/day	Yellow
L	Leave	—	As approved	Orange

4. PROCESS STEPS

1	**Receive Headcount Plan**	Every Monday, the Operations Manager shares the weekly headcount requirement — minimum employees needed per shift per day for all three departments.

2	**Check Leave & Week-Off Requests**	Review all pending week-off and leave requests submitted by employees for the upcoming week. Log approved requests in the Week-Off & Swap Log sheet before building the roster.
3	**Build Weekly Roster**	Open the Weekly Shift Roster sheet. Assign shift codes (M, A, N, W, L) for each of the 30 employees across all 7 days. Each employee must have exactly 1 week-off per week.
4	**Validate Headcount**	Check the Daily Shift Count Summary at the bottom of the Roster sheet. Cross-verify with the Headcount Tracker — all Status cells must show OK. If any show SHORTAGE, reassign shifts to cover the gap.
5	**Handle Swap Requests**	If an employee requests a shift swap, verify that the receiving employee is available and that headcount is not impacted. Log the swap in Section 2 of the Week-Off & Swap Log with Approved or Pending status.
6	**Publish & Communicate Roster**	Once the roster is validated with zero shortages, share it with all team leads by Sunday evening for the upcoming week. The roster is considered final once published.
7	**Weekly Review & Reporting**	At the end of each week, review actual attendance against the roster. Flag any unplanned absences. Share a summary with the Operations Manager highlighting any recurring shortages or high swap rates.

5. ESCALATION MATRIX

Scenario	Action Required	Escalate To	Timeline
Shift shortage (Actual < Required)	Reassign available employee or request overtime	Team Lead	Same day
More than 3 swaps in one week	Review and flag for manager approval	Ops Manager	Within 24 hours
Employee absent without prior leave approval	Mark as Unplanned Absence, initiate follow-up	HR & Team Lead	Same day
Night shift headcount below 6 for 2+ consecutive days	Emergency reallocation or temporary hiring request	Workforce Planner	Immediately

6. KEY RULES & COMPLIANCE

#	Rule
1	Every employee must get exactly 1 week-off (W) per week — no exceptions.

2	Shift codes must be entered in UPPERCASE: M, A, N, W, L. Lowercase will break formula counts.
3	Roster must be finalized and published by Sunday 6:00 PM for the upcoming week.
4	No employee should be assigned Night shift for more than 3 consecutive days without a break.
5	All swap requests must be logged in the Swap Log before they take effect — verbal approvals are not valid.
6	Minimum headcount per shift must be maintained at all times — shortage is not acceptable without escalation.

7. DOCUMENT CONTROL & REVISION HISTORY
